

Uses of Flax

Linseed Oil (High Linolenic Acid)	Adhesives, i.e. manufacture of hardboard and fibreboard Protective Coatings: paints, house paint primers, varnishes, lacquers, stains, alkyd resins, enamels, epoxidized oils Floor Covering: linoleum Oilcloth, tarpaulin and other coated fabrics Patent leather Industrial Chemicals: fatty acids, soap, glycerin Printing inks, grinding oils, newsprint, core oils, caulking compounds, waterproofing compounds, mastic cements, foundry binders, brake lining, hardboard, shoe polish, herbicide and pesticide carrier Antispalling and curing treatments for concrete Tempering oil, bonding oil, and highly conjugated oils for hardboards
Seed	Specialty Edible Products: - cakes, muffins - bread products (whole seed or flour) - replacement for sesame seed in baking products - cooked and dry cereals
Seed & Oil	Health Food: - source of linolenic acid - to make pills - inclusion in pharmaceutical mediator mutations
Linseed Meal	High protein animal feed Seed, oil, meal: Dairy and beef cattle, swine and poultry feed and also to increase levels of linolenic acid in food products, i.e. eggs, meat and milk Pet Foods: seed and meal Fish feed in fish culture: Seed and oil - source of linolenic acid required by growing fish, i.e. salmon
